I

2-6-91

Dear Dr. Weisberg,

Just this moment finished reading "Frame-Up" and I must confess that I am shocked that both defense and prosecution actually got away with what they did. I am also impressed by the quantity of the "nuts and bolts" that were included. I truly marvel at your resourcefulness.

In some of the literature that I have read there is mention of a group known as either the "Intruders or the Marauders" who were supposedly guarding Dr. King. Allegedly they received a phone call and without any explanation abandoned the Lorraine Motel just moments before the fatal shot. You made no mention of this. Why?

A Item: a meeting supposedly took place between Holloman a black fireman or policeman who was going to be on duty at the time of the fatal shot and an unnamed third party. Holloman supposedly introduced his black employee to the unnamed third party with the words, "This agent from Washington

has just informed me that a threat has been made against your life and because of this, we are going to transfer you to another station for your own protection." The "agent from Washington" never spoke. Was this fireman or policeman the one who Reddick or his partner were inquiring about? I believe his name was Hall. You didn't mention this meeting. Why?

Since you published, have you been able to track down Raoul Illanek? What have you been able to find out about Karl Esquivel? Has the tramp in the photo been identified? Did Ray ever turn over those phone #s he wanted checked out to Fensterwald? If so did Dud check them out? Did Ray ever name names to Dud? After 23 yrs since the deed was done do you still feel the need for anonimity regarding those who had foreknowledge of the crime? Why? Did Dorel ever disclose what he knew? What can you tell me about the Davis Detective Agency of Los Angeles? I have heard Mark Lane allege that this agency knows a great deal. Was Lawrence Howard & the young Mexican who was seen

constantly with Oswald in New Orleans? Did Dud ever publish a book on the case?

Author-newsletter publisher Paul Hoch recommends highly "The Mulkin Conspiracy" by Phil Melanson. Are you familiar with it and if so what is your opinion? When will "Tiger to Ride" be published?

You advise that I keep away from the Herve La Mare/James Hepburn book "Farewell America". Why? Robert Groden says it is a very important book written by someone who has intimate knowledge of the C.I.A. and of the power structure that rules and runs America. What can you tell me about La Mare? Why did he have to write this book under a pseudonym? What is the significance in Turner having funnelled it to Harrison? Have you read Turners "The Herring Is Red"? If so your opinion sir

Finally (and I'm sure to your great relief) I can the good doctor recommend to me a number of bookstores that I could write to in my quest to acquire additional reading material of this jonkae

IV

God bless you and keep you alive and well in your endeavors. Foaming at the mouth in anticipation of your reply, I remain

Yours truly,
Pete Voss
I bid your place

P.S. Would you dedicate my next copies to CIBACUYO, A PUERTO RICAN PATRIOT WHO GIVES A DAMN. (CIBACUYO IS MY NICKNAME)

P.P.S. Why have I never heard of any book being published regarding the attempted assassination of George Wallace?

P.P.P.S. Please keep me in mind in case you or your friends and colleagues should run across Oswald in New Orleans.

Shalom
